IG Simulator
A Product of IG Drones™

Simulated Application
Flight Training

MADE IN INDIA

India's First Indigenously Developed Drone Simulator

Embrace drone technology with IG Simulator - Professional pilot training software using IG Drones leading flight control technology to recreate the natural flying experience to improve piloting skills for various defence & industrial applications.

Immerse yourself in an
Authentic
Flying Experience

This software tailored for varied applications allows you to hone your piloting skills without the potential risks and costs associated with real-life training. Every aspect of IG Drones' unique flight control technology is analyzed and adapted to create the most realistic simulated flying experience.
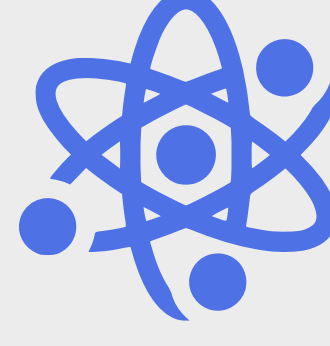

Built to cater
Defence & Industrial Applications

As a part of **Aatmanirbhar Bharat Mission**

3 Flying Modes

5 POVs

Comprehenssive Physics Engine
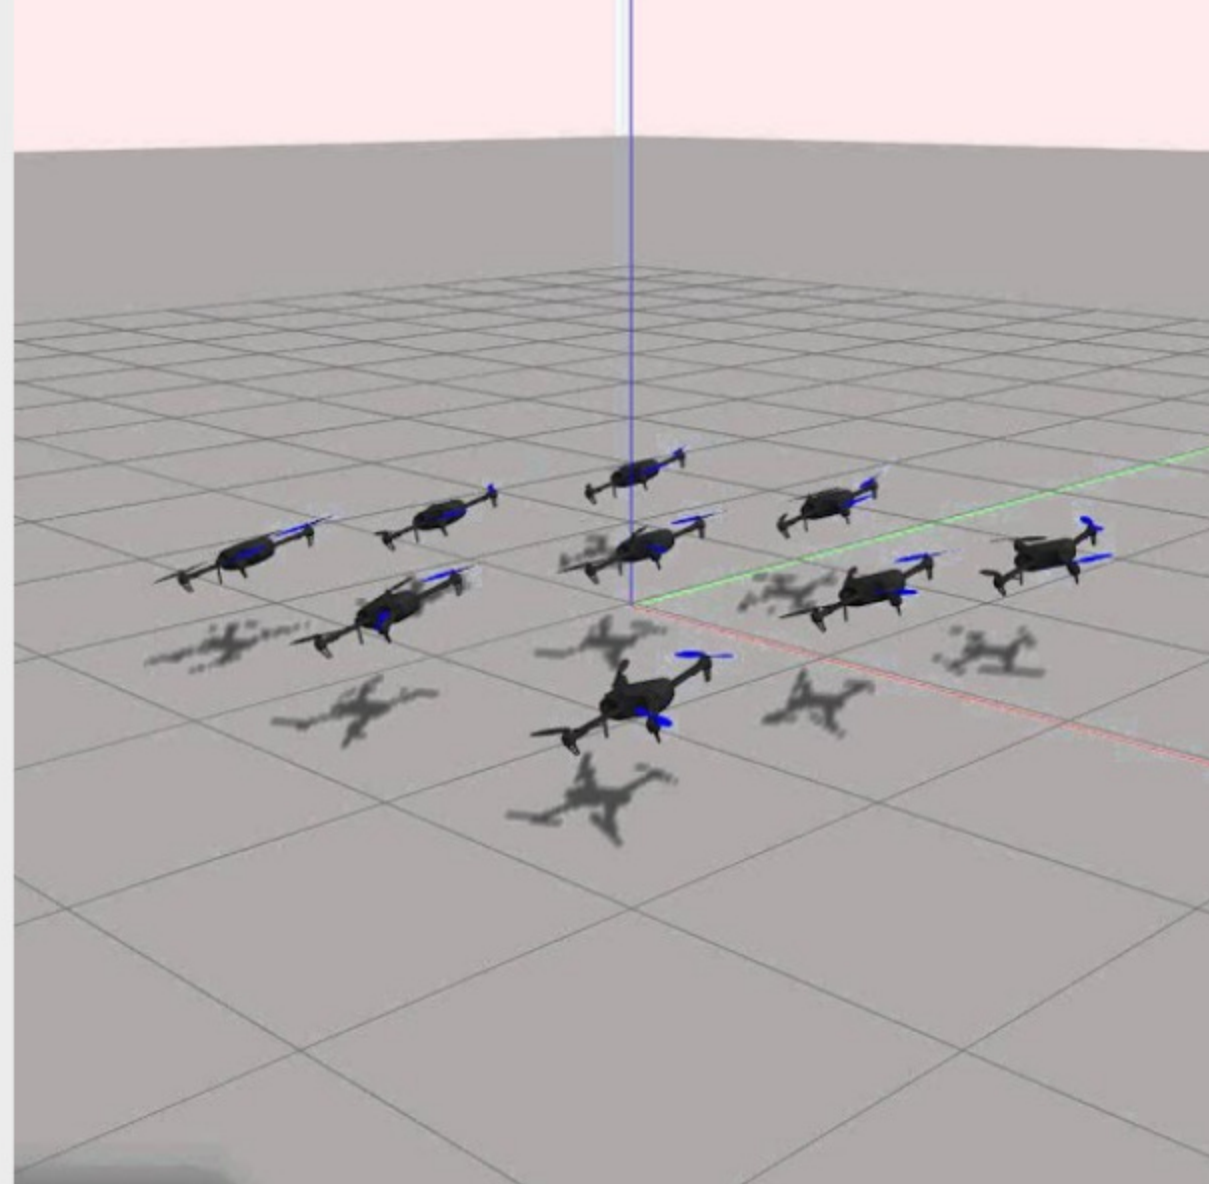

Fly like a
Real-Life Environment

Experience feedback from the surroundings just as you would pilot a real drone

Wind Effects

Ground Effects

Simulated Crashes

Seamless Connectivity

Set up and access the Flight Simulator easily through its seamless connection to Windows PCs and Certified Drone Transmitter/PlayStation/Xbox radio controllers

Warning : High Altitude

Quick Menu
